We often assist new vessel owners during Marimos two day handover process and your boats first trip away! Our experienced skipper will be present during handover discussions that can help identify any teething issues (if any) with your new boat from initial use. Because our skipper is already quite familiar with the systems on-board Maritimo vessels, the handover will be very thorough.

This knowledge can then be reinforced to you thoroughly over the course of several days, to ensure you have a very good understanding of your entire boat and all of her systems. Owners love this service because it provides them with a very good working knowledge of their new boat, and gives them the confidence to operate independently. We often head off on your vessels first voyage away (often to Tangalooma, Wavebreak Island, Jumpinpin etc.) while you have the full support of a skipper.

A vessel delivery can be added to this service. For example, you spend a few days with our skipper operating and learning all the vessels systems, and then together (plus more crew if needed) you will deliver your vessel to your home! Depending on the destination, you'll get some great offshore experience also!
